

Zigbee Stack Components

Zigbee 3.0 and Next Versions

“Zigbee Certified Product”

Product implementation that uses the common device types definitions (e.g., switches, bulbs, etc.) and implements Zigbee functionality based on features available in Zigbee PRO 2023 or earlier network stack (your product implementation including features, commands, drivers, etc.)

Zigbee PRO 2023 or Earlier

“Zigbee Compliant Platform”

Network Stack that delivers connectivity and enables features for the product (Zigbee PRO 2023 or earlier network stack from your selected vendor)

IEEE 802.15.4 Radio

IEEE 802.15.4 physical radio and MAC layer that drives communication over low-rate wireless network (represented by silicon chip from your selected vendor)
